NEW CONSTRUCTION INSTALLATION

Drawing 1

Drawing 2

1. Fastening fixture to ceiling

Joist-type ceiling-extend bar hangers to fit between joists. Position fixture temporarily by hammering "Nail" into joists. (Drawing 1), then secure permanently with nails. Hangers should be level with bottom of joists. Suspended (T-bar) ceilings-extend bar hangers 1" past T-bars, then rest fixture on T-bars. Secure fixture to T-bars with wire (drawing 2)

REMODEL INSTALLATION

Carefully cut a hole of 4-1/2" diameter into the ceiling.

Pull supply wire through opening and make electrical connections. Refer to "electrical connections" section.

Insert the housing in ceiling cutout as illustrated.

INSTALL

Fig.1

Fig.2

Fig.3

With clips seated properly in can (fig.1)
Insert remodel housing into ceiling, junction box first.
Hold fixture up against ceiling and push clip through housing slot (fig. 2)
To lock clip in place push flat portion against side of can (fig. 2)
To release pull down on clip (fig. 3)

TRIM INSTALLATION

Final Result

Connect the male(module) into the female(Can) connector. Insert baffle/reflector into the module use trim to secure.

ELECTRICAL CONNECTION

1. Housing without LED driver

Connect-

- Black - Supply Voltage
- White - Neutral
- Green Ground J-box wire -copper or green grounding wire

2. Housing with LED driver

Junction box contains two wires. A black(hot+) and a white(neutral-) which must be spliced to the house current feed wire. Make sure to splice white to white and colored or black to black. After splicing has been completed, tuck splices carefully into junction box and replace cover(drawings 3)

3. Grounding

for Romex or 3 wire BX. flexible armour cable installations attach supply groundlead(green) to bare copper groundlead or ground screw in wiring box mounted on plaster frame. Local electrical codes should be consulted to determine acceptable installation-conduit Romex, or flexible Armour cable.
