SPECIFICATIONS

Housing

The Beeline series housing is a weather tight 2-piece aluminum extrusion unit.

LED

EncapLED, an IP66-rated LED module system, combines optics and heat sink into one configurable unit which give precise light distribution. Available in types II, III, IV & V. It allows us to do 20w. increment adjustment on light output. The module achieves 110-120 lm/w efficacy with LUXEON LUMILEDS TX CHIPS. Beside maximizing heat dissipation surface, we also utilize convection-based heat management which creates additional air flow around each chip. Unlike a big metal heat sink where the temperature for the chips in the middle is higher than the rest, the heat of each EncapLED chip gets dissipated evenly. A better heat dissipation design keeps the junction temperature low and ultimately prolongs the life of the LED chips. Our modules are available in any of our fixture designs, as well as in a simple retro-fit kit form for existing fixtures.

Mounting Options

Heavy duty aluminum base plate secures to the housing. Mounting kit with anchor bolts, included.

Finish

Thermoset polyester oven-baked powder coat, in Dark Bronze. Custom colors are available to your specification.

Warranty

5-year warranty
