

Pole Products Flag Pole

An Ameron™ spun-cast concrete pole provides a uniquely premium appearance. Complete your package with a flag pole to match your lighting poles and bollards.

Reduce flag entanglement and prevent unauthorized removal with our internal halyard system utilizing a 360° rotating truck, marine quality halyard and hardware, and sleek-looking locking hand hole cover. For flag illumination, we can install optional inserts at 15' above grade to allow placement of light fixtures above vandals' normal reach. With the added protection of our anti-graffiti coating, vandal spray paint cleanup is quick and easy.

Nothing beats the beauty of spun-cast concrete. Our poles last a lifetime.
Made in the U.S.A. 10 year warranty.

Materials and construction

Flag pole shafts are prestressed with high tensile steel cables, providing internal strength and resilience. High-strength concrete is then spun-cast to produce a pole of superior durability. Choose from our complete matrix of standard and pre-formulated colors, aggregates and finishes.

Applications

- Government and municipal properties
- Business buildings and commercial parks
- Malls, theaters and shopping areas
- Parks and community centers
- School, college and university campuses
- Memorial gardens
- Stadiums and sporting areas
- Landmarks

Shapes and sizes

- Available in 3 shapes: round, octagonal, square
- Heights 20'–50' above grade

Spun-Cast Concrete Flag Poles

Round					Embedded Style (FER)			Base Plate Style (FBR)			
Pole Height (nom.)	Top Diameter	Base Diameter	Ball Diameter	Flag Size	Catalog Number	Embedded Depth	Pole Weight	Catalog Number	Anchor Bolts	Bolt Circle	Pole Weight (lbs)
20'	5"	8"	6"	3' x 5'	FER-6	4'-11"	750	FBR-6	1" x 36"	11.5"	600
