Holon's timeless design enables this fitting to find application in a vast range of projects. The simple and yet strong geometrical form earns its place in residences, office lobbies, corridors, meeting rooms and other public areas.

Holon 80, the larger counterpart of Holon 40, is a product range of directional spotlights and downlights. Various options in LED colour temperature, beam angles, lenses and drivers are available to optimize the desired light effect for each project, either residential, commercial, or hospitality.

Holon 80 directional rotates 360° and tilts up to 90°. The hinge of Holon 80 directional is permanently tensioned, allowing the luminaire to remain at any angle, from 0° to 90°, while allowing effortless adjustment.

In addition to the directional spotlight, this product range comes with a second variety: Holon 80 fixed. This downlight is designed for rooms that embrace the language of form of this luminaire, but don't require an adjustable luminaire head.

Construction

Luminaire

Made from zamak die cast aluminum alloy.

Finishes

- White (RAL 9016)
- Black (RAL 9004)
- RAL color finish upon request

Mounting Options

Directional recessed mounted, directional surface mounted, or fixed. Suitable for installation on drywall, wood panel or grid ceilings with acoustic tiles.

Classifications

Dry locations only

Electrical Characteristics

LED Specification

Xicato Zhaga compliant LED module with Corrected Cold Phosphor Technology® (remote phosphor to limit color shift over time. Tight color consistency within 1x2 MacAdam Ellipses).

For Warm Dim, Tunable White and Full Color Tunable Options

Lumenetix Araya 5 LED module - 5 color chip array to stabilize coloring across full spectrum, with all 1640-8000K whites occurring fully on black body curve, maintaining

95CRI or better. Tight color consistency with Max 2 SSD.

LED Life

L80 greater than 50,000 hours.

Correlated Color Temperature (CCT)

- Available in 2700K, 3000K, 3500K and 4000K Warm Dim range 1800K-3000K, tunable white range 1650K-8000K, and fully saturated color with color tunable option.
- CRI 80+, 95+, 98+.

Gear

Standard 0-10V dimming, universal voltage (120-277V). For non-dimming applications, cap off dimming wires.

Holon 80 – Surface Mounted Monopoint, 3” Aperture

Mounting Examples

Fixed (driver inclusive, sheetrock ceiling)

Directional Surface Mounted (driver inclusive, sheetrock ceiling)

Mounting Examples

Directional Recessed Mounted (remote driver, sheetrock ceiling)

name	reference	visible Ø	cut out A	B*	C
Holon 80 plasterkit no shadow gap	KR717104	3.15"	Ø 4"	2.36"	**
Holon 80 plasterkit shadow gap	KR717108	3.4"	Ø 4"	2.36"	**

* installation depth B is in case the driver is placed at a distance, and accessible from another location.

** installation depth C is in case the driver has to be pushed through the plasterkit in order to be close to the fixture. The length of the driver determines C as it has to be pushed perpendicular through the plasterkit.

Depth = length of the driver + 1.18"

If the length of the driver is e.g. 4" then C = 5.18"

Put the plasterkit in the hole in the ceiling

Fix the plasterkit with screws

Fix the stoppers, until they are blocked against the ceiling

Fill around perimeter of plasterkit using suitable filler and plaster to hide screws and plasterkit.

Connect the mains voltage to the gear.
Connect the cables coming from the fixture to the gear.
Push the gear through the plasterkit onto the ceiling.

Holon 80 Directional Surface Mounted

Holon 80 Fixed
