## ADVANCED HIGH CEILING **REV 4 - Retrofit** Tunable White Version (ColorFlip<sup>™</sup>)

# METE<sup>O</sup>R

4-inch aperture high lumen recessed downlight utilizing Meteor Lighting's proprietary ColorFlip<sup>™</sup> Tunable White solution, that results in superior efficacy and heat management. This product is compatible with all existing 0-10V and DMX control systems. Bringing human centric lighting to your spaces.

## **Electrical System**

- 20W, 40W
- Power Input: 120V or 277V
- Operating Temperature: -40°F~104°F
- Surge Protection: 4KV- Remote
- Power Factor Greater than 0.9

## **LED Technology**

- ColorFlip<sup>TM</sup> (Tuning White: 2700K  $\leftarrow \rightarrow$  6500K)
- 85+ CRI
- Beam Angle: 45°, 55°
- Rated Life > 60,000 hours (L70)

## **Advanced Dimming**

(Proprietary VX Driver is incorporated to all dimming options for video flicker-free lighting)

- Superior 0-10V: dims to 1% (2 channel) 1 channel control dimming. 1 channel control CCT.
- DMX: high resolution dims to 0.1% (2 channel) (Supports ANSI E1.20 RDM protocol)
- DALI: dims to 10%

## **New Construction**

- Non-IC Rated, insulation must be kept >1ft from housing.
- Aperture: 4.25" (108mm)
- Opening of Mounting Frame: 4.72" (120mm) to 5.1" (127mm) Max
- Oversize Trim: 5.25" (133mm)
- Ceiling Cutout: 5" (127mm)
- Maximum Ceiling Thickness: 2" (50.8mm)
- Tool-less top access allows service from above and below.
- Light engine, optics, and driver(s) accessible from below ceiling
- Weight:7lbs

#### Warranty

## Dimensions

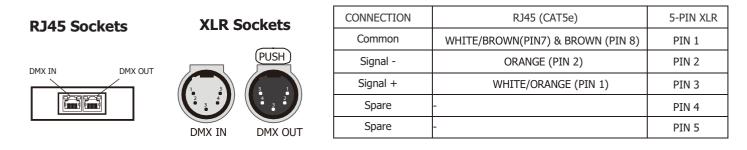

## **DMX Requirements**

The REV 4 LED fixture with DMX unit has TWO CHANNEL per fixture (1 to control intensity, 1 to control color). Fixture will be controlled by DMX number controlling intensity. We do not recommend more than 32 fixtures per DMX daisy chain. When placing order, please indicate DMX address (refer to DMX Address example below). DMX address will be listed on the back of each fixture.

|         | DMX Address               |                         |  |  |  |  |  |
|---------|---------------------------|-------------------------|--|--|--|--|--|
| Fixture | Intensity Control (ex. X) | Color Control (ex. X+1) |  |  |  |  |  |
| #1      | 1                         | 2                       |  |  |  |  |  |
| #2      | 3                         | 4                       |  |  |  |  |  |
| #3      | 5                         | 6                       |  |  |  |  |  |

The LED fixture provide RJ45 Socket or XLR socket to connect. (DMX cable NOT included.) The final fixture should be terminated by the use of DMX Terminator (by others).

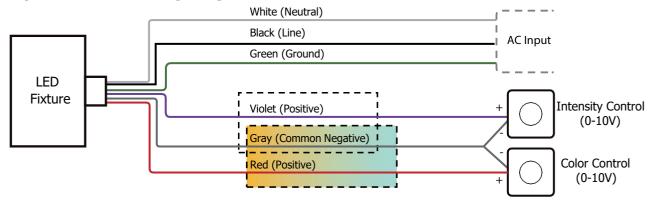

## **Compatible DMX Cabling List**

DMX uses a cable consisting of two twisted pairs plus a shield to carry data. The cable must be specifically impedance matched for the digital DMX signal, meaning that microphone cable or other non-rated cable **must not be used to carry DMX**. Network cable (Cat5, 5e or 6 cable) may be used to carry DMX in an installation; however special consideration must be given to shielding and termination. Under no circumstances should solid core cable like Cat5 be terminated into a screw down connector.

Meteor recommends the use of Belden 9729 for DMX installation. Belden 9729 is a two pair cable, which allows for a spare pair for 'out and back' type terminations if needed. Below is a list of other compatible Belden cables.
